## Mrs. George H. Hurlbut

Pioneer and Honored Resident of the District Passes Away

The many friends and acquaintances of Mrs. George H. Hurlbut, learned with sorrow that she had passed away at her home, on the south half of section 28, township 23, west of the 4th meridian, on Wednesday, October 28. She was in her 64th year and was a daughter of the late Mr. and Mrs. John Hall, of Hall's Corner, St. Louis, Mo. On May 25th, 1865, she was married to George H. Hurlbut, of Riverview, Ont., where they resided until the Spring of 1912, when they moved with their family to their farm near Empress, Alberta, where she resided until the time of her death.

She leaves to mourn her loss her husband, two sons and three daughters: William J. Geo. Wesley, Christina, Annie J., Minnie M., also nine grandchildren, all residing near Empress, Alberta.

She was a Presbyterian, a faithful wife, a kind and loving mother, and was highly esteemed by all who knew her.

The funeral service was preached at Empress United Church, by her Pastor, Rev. Shields. The remains are to be taken to Shellbourne, Ont., for burial in the family plot. The bereaved family have the sympathy of the entire neighbourhood.

## An Evergreen Subject

"The world is passing through troubled times. The young people of today think of nothing but themselves. They have no reverence for parents or old people. They are impatient of all restraint. They talk as though they alone knew everything, and what passes for wisdom with us is foolishness to them. As for girls, they are forward, impatient, and unconcerned in speech, behaviour and dress."

—N.Y. we are not saying this. This was said by Peter the Hermit, 841 years ago. How times do change (?) —Ex

## Oil on Troubled Waters

"Oh, John," sobbed the young wife, "I had baked a lovely cake, and I put it on the back porch for the frosting to cool, and the d-d dog ate it!"

"Well, don't cry about it, sweetheart," he consoled, patting the pretty flushed cheek, "I know a man who will give us another dog!" —Powerfax

Drumheller, Alta., is engaging special police to curb lawless activities on Oct. 31.

## Old Country Elections

The Old Country elections on which the spotlight of world interest has been focused, returned the National Coalition government to power with an overwhelming majority. Hamar MacDonald was elected by a majority of 5,931 votes, and J. H. Thomas was also returned. Arthur Henderson, head of the Labor party was defeated, and Lloyd George was returned. The results were:

For the Government.....	561
Conservatives.....	471
Simon Liberals.....	38
Samuel Liberals.....	33
National Labor.....	14

Against the Government..... 57

Labor.....	52
Lloyd George Liberals.....	4
Scottish National.....	1

## Has Narrow Escape

Clarence McCauley, had a very narrow escape from death by asphyxiation on Tuesday, while using a blowtorch on plumbing work in the basement of D. McEchern's house. Ivan Bowler who was at work on the residence, found McCauley near his work in a state of collapse. Mr. McCauley was taken to the hospital for treatment.

Mrs. Wm. Leuch, has as her guest, her sister from Bascom.

Seven more cents are to be heard from. It is expected that the defeat of Arthur Henderson will see Lloyd George leader of the opposition and virtual head of the Labor Party.

### A Time For Self Control

As Shakespeare once put it, "the times are out of joint." These are troublous days, and days of trouble. Men's nerves are on edge, and little things that would be passed over lightly in good times are every day becoming the cause of quarrels. Because nerves are on edge, tempers are out of control even to the extent they usually are, and in the case of most people tempers are never controlled as they should be.

Today people will argue and dispute about almost anything, and lose their tempers over the most trivial matters which are of no importance whatever. The great Bard of Avon wrote: "Beware of entrance to a quarrel; but, being in, bear it that the opposed may beware of thee." Abraham Lincoln, however, said that while this advice was good, it was not the best, and he substituted: "Quarrel not at all. No man, resolved to make the most of himself, can spare time for personal contention. Still less can he afford to take the consequences, including the violation of his temper and the loss of self-control. Yield larger things to which you show no more than equal right; and yield lesser ones through clearly your own. Better give your path to a dog than be bitten by him, in contesting for the right. Even killing the dog would not cure the bite."

This is not to say that a man's sense is so much as one important consideration, or yield his principles for the sake of peace or profit. There are times when a man should get mad, when we could feel nothing but contempt for him if he did not. But in such occasions as few and far between. The trivial, inconsequent thing should never be the cause of dispute or outbreak of temper.

We are reminded of the three-word Latin motto above the doorway of the ancient chamber in the Guildhall in which the aldermen of London hold their court and which no one of them can fail to see: "Audi alteram partem." Hear the other side.

And in old England, with its long years of experience in handling human beings of all classes and degrees in all parts of the world, how much wiser than other nations is in dealing with agitators. The Old Land long ago learned that talk, like any other gas, is dangerous only when compressed. Younger countries, Canada included, has yet to learn that lesson. So we find in London, instead of attempting to suppress the Hyde Park orators, the British authorities supply police protection for them, let them say their say, and do not quarrel with them.

And what is the cause of most misunderstandings, leading to loss of temper and open quarrels? It is not that a man is self-possessed and that he is wasting our energies and increasing our blood pressure trying, over trivial things, to set somebody else right? Instead of accepting people for what they are, we are forever trying to mold their lives to our preconceived model, endeavouring to organize them. How many married couples live in a state of tension because one or both seek to make the other over. If once the idea got abroad that the real appeal of the sexes is the fact that they are not alike, what a great gain that would be. And what applies to the sexes applies equally to races, creeds, and other established facts of life.

Let us stop trying to organize the lives of other people, and attend strictly to the task of organizing our own. Let us master ourselves first, that, after all, there are comparatively few issues in this world worth disputing over. It would, of course, be a sad day for the world if righteous indignation vanished from the human mind. But the indignation that is the source of profit and place of power that they could no longer get mad over palpable wrongs and gross injustices. But the point is that too much of the world's anger is poured out in defence of pride or prejudice instead of conviction.

As one old Roman philosopher said: "Many have suffered for talking; none ever suffered for keeping silent." And, on another occasion, "We cannot be wrong in leaving other people's business alone."

### Using Seed Cleaning Units

#### Saskatchewan Municipalities Taking Advantage Of Outlets Supplied

Several municipalities in Saskatchewan already have made applications to the Field Crop Branch of the Department of Agriculture for seed cleaning units as supplied by the Saskatchewan Government in co-operation with the Dominion Grain Board. Under this scheme, the Governments furnish the machinery, the municipality being required to provide the motive power and the housing accommodation. All the outlets supplied to date have been of an itinerant nature, and may be transported from farm to farm during the seed cleaning period.

Exhausted From Asthma. Many who read these words know the horrible drain upon health and strength which comes in the train of asthma. It troubles many, and it troubles you, however, that there is one true remedy which will quickly and permanently cure you of this distressing ailment. It has a long record of relief to its credit. It is sold almost everywhere.

A machine that tests in 24 hours how much a sample of wall paper will fade in two years is in operation at the Bureau of Standards, Washington.

### Saskatchewan University

#### Increased Attendance Is Shown For The Current Term

Former students returning to Saskatchewan University brought up enrolment in the regular classes to 1,043 or 47 less than last year, announces President W. C. Murray. To offset this the number enrolled in the correspondence courses has increased by 37 to 303, giving a net increase of 10 students.

The decline is mainly in the college of arts and sciences. The College of Pharmacy shows reduced enrolment, and engineering a considerable loss. The other colleges have about the same numbers as on the corresponding day last year.

### No Wonder He Died

#### Shakespeare's Death Caused By Complication Of Thirteen Ailments

The death of William Shakespeare, 42, years, was due to complication of 13 diseases, according to an article in *Lancet*, British medical journal, by Dr. J. D. Kellogg's asthma. Remedy is a wonderful check to this distressing ailment. It has a long record of relief to its credit. It is sold almost everywhere.

Similarity Of Names  
Postal officials direct attention to the similarity in post office names in Canada and the United States, and ask persons to be careful in addressing mail matter to such points. These offices are Hamilton, Ontario, and sometimes confused with Sanbridge, Manitoba, Oak Bluff, Manitoba, which is frequently confused with Oak Bluff, Mass., U.S.A.

Boring Guest: That is a strange clock when I have in the hall.  
Host: Yes, we call it "The Guest."  
Guest: Why is that?  
Host: It won't go.

### Deep Buried In Snow

#### Found Alive Eight Weeks After South African Storm

Hundreds of South Africans saw a full moon for the first time in their lives during a recent heavy storm on Table Mountain and other Cape ranges. While the present season is "winter" on this side of the equator, snow has rarely been seen this far south.

From the interior comes a story of how a sheep lived for eight weeks under an avalanche of snow in the Molteno district.

Although completely hemmed in, the animal kept alive by breathing through the melting snow and eating the grass on the floor of the aperture, as well as snow. When found they were little more than skeletons. They are now recovering.

### FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hem; and as the skirt was a little wider than the new was darker than the rest, I re-dyed the entire drape, after having fastened the new skirt to the old one. The Diamond Dyes for the re-dyeing, of course. I have dyed my old skirts and dresses in this way. The results are perfect—smooth, even, colors—fast to wear and washing. Friends think my things are new. I have re-dyed or tinted them in the Diamond Dyes. Do you give me the most gorgeous colors!"  
—Mrs. G.C., Lewis, Quebec.

### Thirty-Five Years Enough

#### Missionary To Work Hands Over Yoke To Younger Men

Duties as a missionary in the frozen Yukon for 35 years have ended for Rev. W. D. Young.

Mr. Young only spent a few minutes in Canada. It was long enough for him to say that he had left the Yukon for ever. Now 73 years old, he handed to younger men the work of spreading the gospel in the distant north.

It was two years before the great Klondike gold rush of 1898 that Mr. Young went north, then 38 years old. Just what he will do now, he does not know, but it is likely he will go to Toronto after his stay in Winnipeg. He made two trips to civilization during the northern stay, which included 25 years at Herschel Island. The first was in 1902 and the second in 1930.

His home, before he went north as a missionary, was in Bruce County, Ontario, where he farmed.

If Miller's Worm Powders needed the support of testimonials they would get them from mothers who know the virtue of this excellent medicine. But the powders will speak for themselves in such a way that there can be no question of them. They are used so thoroughly, and the child to whom they are administered will show improvement from the first dose.

### Kind Words Cost Nothing

There sometimes are excuses to be made for the men and women who are stingy with money, but not for those who are stingy with appreciation. Kind words cost nothing at all; yet some of you are as reluctant to use them as any old miser is to part with one of his cherished gold pieces.

### RESTFUL SLEEP

#### for FRETFUL, FEVERISH CHILD

—With Castoria's regulation

When your child tosses and cries out in his sleep, it means he is not comfortable. Very often the trouble is that his bowels are not moving. It is that poisonous waste matter in his bowels which is the cause of his restlessness. Castoria is a pure vegetable preparation made specially for children's ailments. It is not harsh, harmful drugs, no narcotics. Don't let your child's rest be interrupted. A prompt dose of Castoria will urge stubborn bowels to act. Then relaxed comfort and rest will be his name.

—Dr. H. H. Hatcher

**CASTORIA**

CHILDREN'S CATHARTIC

### Canada Has Thousands

#### Of Level Crossings

Removal Of All Impossible Says Hon. Frank Oliver

The Dominion at present has some 28,000 level crossings scattered along its railways from coast to coast despite expenditure of \$15,189,000 over the past 21 years towards elimination and amelioration of this menace to traffic, according to Hon. Frank Oliver, advisory officer to the Board of Railway Commissioners for Canada, in a paper before the recent convention of the Canadian Good Roads Association at Lacorne-Quebec.

In 1930, a total of 341 railway crossing accidents in Canada took a toll of 115 lives and 475 injured. Mr. Oliver stated. Through the efforts of the Board of Railway Commissioners much had been done to improve railway crossing conditions Mr. Oliver continued.

Crossing accidents on provincial highways formed less than one-third of the total for 1930, the great majority of crossing fatalities occurring on country roads.

An annual government grant of \$200,000 to the Board for the railway crossing fund was inadequate, the speaker said, and it would be impossible to completely remove all level crossings in the Dominion.

J. P. Bickell, registrar of motor vehicles in Ontario, said the number of level crossings exceeded three persons a day on Canada's roads. The total of automobile fatalities in the year 1930 was 1,289 and the injured were approximately 46,000.

### Project To Establish International Currency

Plan Is Suggested To Right World's Wides Unbalances

A project to establish an international currency to fight world-wide unbalances has been disclosed in the Swiss press.

The creation of such a currency would be based on a deposit of \$1,000,000,000 in the world bank by the central banks of the various countries. France would deposit one-third of the amount and the United States the balance, under the plan. Switzerland would be issued by the world bank and distributed among the depositors, covered either by 30 per cent. or 50 per cent. of their gold deposits. They would also draw coverage from money circulating in the various countries.

World bank quarters were confident the plan would assume concrete form in the near future. This was based on a belief that France and United States would call an international currency conference after Premier Laval's visit to Washington.

### Lower Prices For Honey

#### Honey Prices In Ontario Lowest In 25 Years

Honey values in Ontario have reached the lowest point in 25 years, according to officials of the Ontario Honey Producers' Association, and while that is true, the flavour of this year's product is rated much better than the average year. Last year's crop in round figures in Ontario was 15,000,000 pounds and this year there is a 60 per cent. crop, or about 7,500,000 pounds.

There has been a good demand from countries like Holland for buckwheat honey at four to six cents a pound and producers hope for better prices than those now prevailing, under which they get only about 5 to 6 cents a pound. Last year's prices were easily 2 cents a pound, on the average, above this year's price.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. Little green rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels redness and itching. Keeps skin soft and velvet. Unexcelled for its purity, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

### Trade and Commerce

Oregon has a buy-at-home campaign and so has the state of Washington. Each is cancelling contracts which have "been made across the border. Keep it up. Buy only in your own state, buy only in your own home town, buy only on your own side of the street, buy only from a member of your own family and thus get rich. The whole idea of trade and commerce is to see that he old-fashioned and foolish—Toronto Star.

An automobile with a body, running boards and fenders built of laced straw, is being exhibited in the Madeira Islands.

A bird of paradise ornaments the new special stamps issued by New Guinea to commemorate ten years of British occupation.

London will add 400 policemen to its city force.

## MACDONALD'S Fine Cut Canada's Finest Cigarette Tobacco with ZIG-ZAG papers attached

### No Longer a Bugbear

#### Britain's Departure From Gold Standard Not Likely To Harm Anybody

The United States owns nearly half the gold supply of the world. At the beginning of the present month, United States-owned gold amounted to \$4,948,000,000, a new high record. Yet in the Republic at this very moment, some millions of men, women and children are fearfully wondering how they are going to keep warm and feel this coming winter.

Perhaps the position of the United States has little real relation to the gold standard in Britain, or its departure from it. Yet existing world realities have knocked so many ancient and cherished theories into the scrapheap that it will be surprising if what has been done in Britain visits much harm upon anybody. Currency changes, most certainly, long ago ceased to be a bugbear—Ottawa Journal.

### Cutworm Damage

#### Survey Will Be Made In Several Areas

A survey of cutworm damage will be undertaken immediately by the Entomological Branch of the Dominion Department of Agriculture.

The object of this study is to secure accurate information with regard to the amount of damage done by cutworms. For this purpose several areas in the vicinity of Saskatoon, Saskatchewan, have been chosen.

It is also expected that as a result of this survey information that will show the relationship of farm practices and farm management to cutworm damage will be obtained and better methods of control may be developed.

### City Covers Big Acreage

Regina is one of the largest cities in Canada. It covers 8,408 acres, more than twice as big as many eastern cities of similar or even larger population. Within the confines of Regina are more than 500 acres of civic parks, nearly 100 acres of exhibition grounds, besides a great deal of vacant property. Regina could comfortably accommodate twice its present population without extending the boundaries.

### Mail Service Suspended

During the season of closed navigation on the Yukon River, which will continue approximately from October 1 to May 31, parcel post service in the Yukon will be suspended, except for the post offices of Champagne, Lacrosse and White Horse, according to post office bulletins.

Steel owes much of its usefulness to the presence of carbon, thus insuring hardness.

### Canada Keeps Gold Standard

#### Premier Bennett Says No Change Is Contemplated

Canada retains the gold standard, and it is not proposed to abandon it. This, in effect, is the statement of Premier R. B. Bennett. For a long time, rumour has the Dominion proposed to abandon the gold standard was drawn to the attention of the Prime Minister. His answer was emphatic. The Government had not changed the position taken when news of Great Britain's departure from the gold standard was flashed across the ocean.

"Canada has not altered the position taken when the announcement was made that England had departed from the gold standard, nor do we contemplate so doing," the Prime Minister declared. "We have appealed and not in vain, to Canadians to conserve our gold supply to meet whatever strain may be placed upon our resources by reason of our foreign trade. It is our duty to do so, and gold will be honoured accordingly."

### Going Back To Primitive

#### Hunters In B.C. Are Using Bow and Arrow For Big Game

Near Longworth, B.C., sixty miles east of Prince George, big game is being hunted with bow and arrow by F. Nagler, of Milwaukee, Wis., an archer of national repute. William W. Tefft, of Jackson, Mich., who has tracked animals in many countries of the world, is accompanying Mr. Nagler.

The expedition, which comprises five members, left Longworth a short time ago. Other members of the novel hunt are Leslie Blair, Arthur Read, of Longworth, and R. A. McLeod, of Deane Creek.

A mysterious submerged valley has been discovered in the North Sea between England and Europe.

Steel owes much of its usefulness to the presence of carbon, thus insuring hardness.

There has been a good demand from countries like Holland for buckwheat honey at four to six cents a pound and producers hope for better prices than those now prevailing, under which they get only about 5 to 6 cents a pound. Last year's prices were easily 2 cents a pound, on the average, above this year's price.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. Little green rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels redness and itching. Keeps skin soft and velvet. Unexcelled for its purity, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

## Conservative Leader Urges Election To Decide Manitoba Issue

Rosevear, Man.—An opportunity for the people of Manitoba to elect a government of their own choice and not be forced to accept a coalition cabinet as proposed by Premier John Bracken, was urged by Lieut. Col. F. G. Taylor, leader of the Provincial Conservative Party, Col. Taylor was replying to the Premier's speech at Killarney.

The Conservative leader urged that the voters should have the chance of selecting their party and then, should the government majority be insufficient, that would be the time to start talking of a union government. After the people have expressed their opinion, he said, was the time for such proposals. "Mr. Bracken need not be afraid of getting all the support he needs from the Conservative party if that is the case after an election," he added. His party had never opposed the government of majority ministers of the past, he continued, "except on matters of policy."

It would be impossible "for the Conservative party to go into any government with Mr. Bracken at its head," he declared. Here he charged the Bracken administration with responsibility for the financial condition of the province.

Col. Taylor said he felt the Conservative party was behind him in his feeling that "there could be no coalition with Mr. Bracken at the head of any government."

The Conservative leader charged the Premier with "dictatorship," and claimed a "one-man government has been the cause of some of the failures of the present government in Manitoba." Now, he added, "they want a truce for five years, with Mr. Bracken at the head of a combined government."

If things were in such "shape" as to require this, declared Col. Taylor, the people should be given the opportunity of electing a legislature. There would be plenty of time to talk about a coalition government then, if it were still required.

### Will Accept Peerage

Chancellor Of British Exchequer Declines To Take Title

London, Eng.—The Canadian Press learns that Rt. Hon. Philip Snowden, Chancellor of the Exchequer, has declined to accept a peerage. Mr. Snowden has announced he will not seek re-election in the coming general election. Election to the peerage, however, would enable him to render continued valuable help to the National Government and a few Upper House, if it is successful at the polls.

Senator Morrow Obsequies

Englewood, W.—The body of Senator Dwight W. Morrow was lowered into a grave at Brookside cemetery at the conclusion of simple funeral services in the First Presbyterian Church. President Curtis, members of the Morrow family and a few intimate friends stood by. There was no other service at the grave.

## Hoover Credit Plan Is Termed Sound Proposal By Sir Thomas White

Toronto, Ont.—President Hoover's plan to form a \$500,000,000 corporation for the extension of credits was termed "a sound, constructive proposal" by Sir Thomas White, vice-president of the Bank of Commerce, in an interview with the Toronto Telegram. Sir Thomas said the proposal of Hoover's proposal "should go far to break the deadlock in credit due to fear and distrust, which has been throttling the internal and external trade and financing of the United States."

"There is more analogy between President Hoover's proposal and the recent action of the British Government in suspending the gold standard than appears on the surface," Sir Thomas continued. "It should assist materially in setting America's gold reserves free to discharge the function for which gold reserves exist."

Sir Thomas said the proposal was essentially the same as that taken by Canada at the outbreak of the war. The Dominion Treasury announced that the gold reserve was loaned to the banks at a reasonable rate of interest upon approval securities of all kinds, to en-

### Find Parts Of Mail Plane

Believe Airliners Taking Mail From Limer Killed Trying To Make Landing

Parrboro, N.E.—A broken piston, parts of smashed wing, a custom-made and two sodden passenger lists were all that Cobequid Bay had given up to establish the fate of Fritz Simon and Rudolph Wogenknicht. "There is not the slightest chance of their being alive," Lieut. Louis Leight told the Canadian Press.

It was Lieut. Leigh, with J. R. McGowan in the seaplane "Pioneer" who first found traces of the mail plane "New York," which crashed off Economy Point. In his opinion the German hero who had been entrusted with the task of flying the mail from the liner "Bremen" at sea to New York, met death after trying to make a landing.

"If the plane had crashed," he said, "the front of the pinnacles would have been smashed. The one we found, although smashed in two, was scraped at the rear. It was evident from the damage that the plane had struck a ledge of rock and the float had been stripped away."

Col. Taylor said he felt the Conservative party was behind him in his feeling that "there could be no coalition with Mr. Bracken at the head of any government."

The Conservative leader charged the Premier with "dictatorship," and claimed a "one-man government has been the cause of some of the failures of the present government in Manitoba." Now, he added, "they want a truce for five years, with Mr. Bracken at the head of a combined government."

## Mob Causes Trouble

Mounted Police Battle With Crowd In Heart Of London

London, England.—A crowd of the unemployed using sticks, stones and fire crackers, battled with mounted police in front of British Legion in the heart of London. Unable to resist the relentless charging of the horses at a gallop and clubbing by police batons the crowd, screaming, finally marched to Hyde Park, where it was served a free meal and went home.

The disorder began when the constabulary appeared and ordered the crowd, which had been marching down Drury Lane, gathering new recruits constantly and singing "The Red Flag," to disperse.

Some of the crowd, which immediately became infuriated, tossed fire crackers into the police ranks, stampeding the horses. Others gathered bricks and pieces of mortar and then charged, arresting the ring-leaders.

## General Election In England

Vote Will Be Taken On October Twenty-Seventh

London, Eng.—Great Britain will vote October 27 in a general election on issues of outstanding importance, it was announced at Buckingham Palace. It will be the first general election since May 20, 1929, when Rt. Hon. Stanley Baldwin's Conservative Government was swept out of power and the Labour party returned to the helm.

At the time of the yearling election the Liberal representation in Parliament was radically reduced but it has held its own since power throughout the period.

The announcement came after Premier MacDonald had conferred with the King.

The new parliament will be called into session early in November, it was said, and will probably for three weeks up to the Christmas recess. The election campaign is expected to begin at once with all three parties striving for an epochal struggle.

## Urges Moralism

Year's Delay On Farm Loan Interest Would Assist Farmers

Winnipeg—A year's moratorium on farm loan interest would enable western Canada to make as rapid a recovery from the depression as any other section of the Dominion, and also would prevent many farmers giving up their farms, according to Col. H. A. Mullins, M.P. for Marquette.

Col. Mullins, who has just returned from a tour of his constituency, said if the mortgage and loan companies decline to take this course they are liable to lose the support of a large number of voters in British Columbia.

Marquette, the member said, was not asking for relief, and is well able to take care of his own people.

## Confidence Needed

Ramsey MacDonald Sees Monetary Policy Must Be Established

London, Eng.—A monetary policy, which will establish the pound sterling as a unit of account, must be inaugurated without delay, Premier Rams MacDonald declared in an election manifesto issued Wednesday, October 7.

His declaration also foreboded negotiations looking toward international agreements "which will remove some of the most fruitful causes of the economic misfortune—such as war debts and reparations—for which the whole world is now suffering."

## ELECTED PRESIDENT

Sheffield, Eng.—The armed peace led to the world. Would it have ended there. But it continues in an aggravated form and as long as our confusions unbroken seems, to be marching to some horrible doom, declared General the Rt. Hon. Jan C. Smuts, distinguished soldier and statesman, President of the British Association for the Advancement of Science, delivering the Basil Hicks memorial address at Sheffield University.

"Unless a real measure of disarmament puts an end to the armed peace," General Smuts said, "we are making for another cataclysm which will be infinitely worse than the horrors of the Great War. In the World War we saw only the beginning of the vast difference which science is making in human affairs. In the Great War, if that is ever allowed to occur, science will, like some out-gauged deity, go far to destroy mankind itself."

"The next war will be unlike anything which has been called war in the past," General Smuts warned. "The time-honoured name of war would properly apply to armies and navies or to the other paraphernalia of war. It will go straight for the populations, and for the immense numbers of people which will be its survivors. It will fight with new heard of chemical and biological weapons. It will cover the fair land and the great cities with poison and disease germs. It will saturate vast areas with a deadly atmosphere."

General Smuts did not argue that the nations of the world should immediately lay down their arms. That would be impossible and entirely illogical. But he did urge a gradual measure of disarmament which would be supported by the trend of the impending forces of the world.

"It is arguable, but only arguable, that the measure of disarmament we should immediately aim at is that imposed on Germany and her allies at the Peace Conference. It may be said that that is our precedent and our standard, and that the undertakings referred to were given in view of and had reference to the complete disarmament of Germany by treaty. I entirely reject the argument insofar as it applies to any immediate disarmament of Germany by treaty. I entirely reject the argument insofar as it applies to any immediate disarmament of Germany by treaty. I entirely reject the argument insofar as it applies to any immediate disarmament of Germany by treaty."

"The carrying out of such a scheme of disarmament would be a moral impossibility, and the more attempt to do so at present would have disastrous consequences."

## Resignation Of Curtius

Withdrawal Does Not Mean Any Change In Foreign Policy Of Germany

Berlin, Germany.—Dr. Julius Curtius, who succeeded the late Dr. Gustav Stresemann as foreign minister of Germany in October, 1929, and kept in force the Stresemann policy of conciliation with Germany's wartime enemies, has submitted his resignation to Chancellor Heinrich Brüning.

His withdrawal came after bitter criticism, especially by National Socialists and Nationalists, who objected because he approved Germany's abandonment of the proposed Austro-German customs pact.

The foreign minister also was attacked on his policy of friendship with France. Government spokesmen emphatically asserted, however, that his resignation did not mean any change in Germany's foreign policy.

## Protest From U.F.C.

Against Closing Of Saskatchewan Traffic And Freight Rates Branch

Saskatoon, Sask.—A strong protest against the closing of the traffic and freight rates branch of the provincial department of railways, which is headed as a "great shock," was issued by United Farmers of Canada headquarters, which are being paid to the value of services rendered by George H. Smith, head of the branch, now dismissed.

Disputing any motive of economy, the statement claims that it is a known fact that the government department indicates that the department has saved the province \$500,000. The spokesman of the U.F.C. also indicated that with the opening of the Hudson Bay railway the functioning of the department is still more essential to the farmers of Saskatchewan.

Will Not Visit Level

Ottawa, Ont.—Premier Laval of France will be unable to visit Canada during his coming trip to North America. An invitation to come to Ottawa was sent to the French Premier by Premier R. B. Bennett. A reply was received Wednesday, October 7, stating that the French Premier Laval will be unable to accept the invitation.

Predicts Jobless Insurance

Calgary, Alberta.—A scheme of unemployment insurance, based upon an actuarial principle will probably be introduced during the life of the present parliament, declared the Dr. G. D. Stanley, Conservative member of the House of Commons for East Calgary.

Sympathy with those involved in recent occurrences in the stock exchange was expressed by Mr. Leman. He said that no uniform criticism is directed against those who have sacrificed years of work and the results therefrom, as well as their own personal means, in order to protect their clients.

The causes which had produced at least such unfavorable results in the financial field were of real benefit to Canada in the economic field by stimulating production of Canadian goods and employment of Canadian labour, the banker said. The lowering of the value of the Canadian dollar places, indirectly, an obstacle against imports of goods which made it easier for the Canadian producer to develop his own production and give more employment to Canadians, thereby creating a sounder economic situation as far as Canada was concerned, he went on.

Referring to the country's banks, Mr. Leman suggested to his hearers they read the annual statements of the various banks covering the years 1928 and 1930. "You will find that every single bank in this country advised people to be careful, that ex-

## Continuation Of Armed Peace Means Another War, Declares Smuts

There will be no escape, not even for the statesmen and the war makers, and a part of the world will rest over all. Even now the laboratories of three continents are busy with their deadly researches. And in due course some lunatic or criminal will press the button and the flower of the human race will be trampled and destroyed. There is still a way of escape, but it lies along the arduous path of disarmament."

General Smuts did not argue that the nations of the world should immediately lay down their arms. That would be impossible and entirely illogical. But he did urge a gradual measure of disarmament which would be supported by the trend of the impending forces of the world.

"It is arguable, but only arguable, that the measure of disarmament we should immediately aim at is that imposed on Germany and her allies at the Peace Conference. ## British Parliament Has Been Prorogued

King George Summarizes Government's Effort To Overcome Financial Trouble

London, Eng.—The British Parliament was prorogued October 7, with a speech from the throne while a general election. The King, in his speech, briefly summarized the efforts of the government to pull the nation out of its financial and economic troubles.

He mentioned that possibly capitalism has reached its zenith and should be replaced by a new economic order. He modified this remark and said that it is a declaration of need to meet the demands of the age, all classes will have to work together in the new order. War and revolution with bloodshed will solve nothing, he maintained.

## Canada Is In Good Position To Lean On Her Own Resources

Montreal, Que.—Canada is well able to lean on her own resources and is doing so. Her production of gold will amount to \$50,000,000 this year, her banking system is sound and business is being done," declared Bourdieu Leman, president of the Canadian Bankers' Association, addressing a meeting of the Catholic Women's league, city sub-division.

Mr. Leman was asked by Premier L. A. Taschereau to substitute for him as speaker.

Sympathy with those involved in recent occurrences in the stock exchange was expressed by Mr. Leman. He said that no uniform criticism is directed against those who have sacrificed years of work and the results therefrom, as well as their own personal means, in order to protect their clients.

The causes which had produced at least such unfavorable results in the financial field were of real benefit to Canada in the economic field by stimulating production of Canadian goods and employment of Canadian labour, the banker said. ## Nationalization Of Credits

U.F.A. Leader Says Money Should Be Provided At Cost, Rather Than For Profit

Lethbridge, Alberta.—The Canadian banking system is a debt-creating system, according to Robert Gardiner, leader of the United Farmers of Alberta, in a speech at the annual convention and president of the organization. In an address here he declared the system should be replaced by a nationalization of currency and credits than for profit as at present.

He also suggested that possibly capitalism has reached its zenith and should be replaced by a new economic order. He modified this remark and said that it is a declaration of need to meet the demands of the age, all classes will have to work together in the new order. War and revolution with bloodshed will solve nothing, he maintained.

General Smuts did not argue that the nations of the world should immediately lay down their arms. That would be impossible and entirely illogical. But he did urge a gradual measure of disarmament which would be supported by the trend of the impending forces of the world.

"It is arguable, but only arguable, that the measure of disarmament we should immediately aim at is that imposed on Germany and her allies at the Peace Conference. It may be said that that is our precedent and our standard, and that the undertakings referred to were given in view of and had reference to the complete disarmament of Germany by treaty. I entirely reject the argument insofar as it applies to any immediate disarmament of Germany by treaty. I entirely reject the argument insofar as it applies to any immediate disarmament of Germany by treaty."

"The carrying out of such a scheme of disarmament would be a moral impossibility, and the more attempt to do so at present would have disastrous consequences."

## Warns Against Insect Menace

Only Weapon Man Has Is This Mind Says Dr. Howard

The warning that man faces a war for existence against his oldest and most dangerous enemy—the insect—is given by Dr. L. O. Howard, former chief entomologist of the United States Department of Agriculture, in his book, "The Insect Menace," published by the Century Company. This menace to civilization now means an economic loss to the world of \$2,000,000,000 a year, the author writes. Dr. Howard believes that the insect world is far better equipped than man to conquer this planet and to make it its own completely. If we base our appraisals on almost any other standard than the relative size of insects and man, "this era would seem to be the Insect Age instead of the Age of Man," Dr. Howard maintains. The only weapon man possesses which gives him a chance to dominate the bug is his mind, the entomologist points out.

"Taken as a whole, the insects are the most successful of all the forms of terrestrial animals," he declares. "Strong, aggressive, multiplying with almost inconceivable rapidity, boasting of an antiquity greater than that of man by at least 40,000,000 years, they would be as though they were quite the most perfect and persistent type that life has evolved. They are our rivals here on earth, and probably the most important thing on the globe will be some active insect sitting on a dead leaf when will represent the last of the life of the plants."

Dr. Howard says that man himself is largely to blame for the increase in the number of insects throughout the ages. Humanity, since it began to cultivate crops and to create conditions peculiarly favorable to certain kinds of insects, has encouraged their multiplication.

"Some of the greatest menaces to agriculture in the United States," the author adds, "have met with over-hospitable treatment on the part of the American farmer. For example, the cotton boll-vee and the European corn-borer. The former would not have spread over the whole cotton belt and caused hundreds of millions of dollars' worth of damage had it not found, on crossing the Rio Grande, that cotton was raised and cultivated and harvested in precisely the way to encourage the multiplication of the weevil and to hasten its rate to an extreme. The corn-borer would not today be the menace it is to our greatest agricultural crop if it did not grow the crop just as we do in enormous fields, leaving the stalks to stand through the winter."

Dr. Howard urges farmers to change their methods of crop growing and make greater use of defensive weapons such as chemicals and airplanes in the fight against insects. He adds that the government of the United States easily leads the world in the insect war with its carefully organized bureau of entomology, and concludes with the hope that man's awakening to the menace will lead to a program to meet it successfully.

## Cause Of Cancer

No Nearer Solution Of Problem Than When Research Work Commenced

Sir George Lenthal Chestle, consulting surgeon of King's College Hospital in London, England, and this year's recipient of the Royal College of Surgeons' award for research into cancer treatment, declared he had found rum worthless in treating cancer of the breast.

"We are no nearer to a solution of the cause of cancer today," he said, "than when we first began trying to fathom the cause."

Lawyer, "But, madam, you can not marry again. If you do, your husband has clearly specified that his fortune will go to his cousin."

Phil Chestle—"I don't care. It's his cousin I'm marrying."

Molten platinum gives the world its best standard of light with which to compare the brightness of lamps and stars.

## Shipping Fever

Great Care Should Be Taken In Handling Of Livestock In Transit

One of the serious loss which at times occurs in shipments of stock and feeder cattle in transit may be substantially reduced, if not entirely prevented, through the exercise of greater care in handling and feeding. The disease is caused by a germ which exists as a harmless organism in the body of healthy animals, in the soil, and elsewhere in localities frequented by animals, and it is widely distributed in nature everywhere. There is no cure for the disease once it develops but so long as cattle are in good condition and normally vigorous the germ remains harmless. It is when the animal's vitality is lowered through the hardships of travel and exposure that these germs change from a harmless state to one producing disease and death.

In a statement recently issued the Hon. Robt. Weir, Minister of Agriculture, urges observance of the following simple rules to prevent "shipping fever":

Ship only cattle in good vigorous condition. Take plenty of time in driving cattle across country to prevent fatigue, and give them sufficient time to rest before loading.

Upon arrival at the yards withhold water until the cattle have rested, then allow a small quantity; do not feed until the next morning, when feed hay and before loading water again.

In not overcrowd in cars, and in cold weather bed the cars well.

Feed and water at proper intervals en route, and allow plenty of time for the cattle to rest whenever they are unloaded.

Too much care cannot be exercised in the handling of stock en route to prevent fatigue, and regular feeding and watering are essential if these losses are to be prevented.

Upon arrival at destination the cattle should be given special care until they have recovered from the lower state of their vitality, which is inseparable from shipment.

## Huge Fire Losses

Loss In Canada During Past Ten Years Reaches Appalling Sum Of \$143,000,000

During the past ten years 286,000 fires in Canada have destroyed property valued at \$143,000,000 and in addition \$426 lives have been lost and 8,558 persons injured seriously by fire.

These figures were given out at Ottawa by J. Grove Smith, Dominion Fire Commissioner, in the course of an appeal for observance of fire prevention week.

Last year 39,200 fires were reported, with a property loss of \$46,110,000.

"If we analyze these figures," Mr. Smith says, "we can better grasp the magnitude of the problem. The average annual waste by fire in Canada represents an expenditure of \$280,000 daily or roughly \$200 for every minute throughout the year. Capitalized at five per cent, it represents the gigantic sum of over \$2,000,000,000 which is only a little less than our present national debt."

## Loss To Manitoba

Dr. Murchie, Of Manitoba University, Leaves For Minnesota

Dr. R. W. Murchie, head of the Department of Economics and Sociology at Manitoba Agricultural College, has accepted the position of Professor of Rural Sociology and Director of Rural Social Research in the University of Minnesota. Dr. Murchie has been on the staff of the Manitoba Agricultural College since 1915, and his departure will be a great loss to both institutions.

During his tenure of office in Manitoba he has pioneered in many fields of social and economic research. Along with Dr. Ridolfi, now with the League of Nations, he conducted the first survey in Canada of the Rural Church and Community Organizations. He has served on various commissions on rural problems and has published several reports on these subjects amongst which are "The Unemployed Lands of Manitoba," and "Seasonal Unemployment."

## Survey Northern Sections

A press dispatch states that the Saskatchewan Research Council has authorized a survey of northern sections of the province where the land area is broken by lakes and rivers and it is believed that the customary regional and quarter-section survey would not prove to be satisfactory.

## Two In One

According to "Punch," a well known sociologist says that the best way to get the most out of life is to fall in love with a beautiful woman or a great problem. Why not choose the former and get both?

## Some Famous Pessimists

Even Most Brilliant Men Looked On The Dark Side

In a recent address at Regina, Mr. George C. McDonald, of Montreal, chairman of the executive of the Canadian Chambers of Commerce, provided a most interesting paragraph which showed that even the great are denied the gift of accurate prophecy. His citations deserve attention from those who seem to think present world conditions will never right themselves. "William Pitt said: 'There is scarcely anything around us but ruin and despair.' Wilberforce, in the early 1800's, said that he 'dared not marry, the future was so dark and unsteady.' Lord Grey in 1819, 'believed everything was tending to a convulsion.' The Duke of Wellington on the eve of his death (1801) thought that he would be spared from seeing 'the consummation of ruin that is gathering about us.' Disraeli (1849) said that in 'industry, commerce and agriculture, there was no hope.' Queen Adelaide, wife of William IV, said 'had only one desire—to die by the part of Marie Antoinette that was coming on England.' Lord Shaftesbury (1868), said that 'nothing could save the British Empire from shipwreck.'"

The old adage about the silver lining may sound bromide, but is soundly based on human experience.—Detroit Saturday Night.

## China Bays Canadian Cows

B.C. Ayrshire Breeders' Association Receives Order For Fifty Head

An order from China for 50 head of registered Ayrshire cows has been received by the British Columbia Ayrshire Breeders' Association. The cows are to be from two and a half years to six years at date of freshening and shipment is to be made to the Hong Kong Dairy and Cold Storage Company.

Some time ago an order for two registered cows per month was placed with the British Columbia Holstein Association by buyers in China. In the past few years such substantial orders for pure bred dairy cows have been received by breeders in B.C. from the Orient.

The journey from Vancouver to the Far East does not affect the cattle in any way to their detriment.

## Wilhelm Becomes Religious

Ex-Kaiser Wilhelm is reported to have become more devoted to religious services than ever. The first thing every morning he reads his Bible, and has religious services at 8 o'clock. In the afternoon he reads religious books, and prayers are a feature of the evening. He is known to have written many of the sermons he has afterwards had preached to him.

"If we analyze these figures," Mr. Smith says, "we can better grasp the magnitude of the problem. The average annual waste by fire in Canada represents an expenditure of \$280,000 daily or roughly \$200 for every minute throughout the year. Capitalized at five per cent, it represents the gigantic sum of over \$2,000,000,000 which is only a little less than our present national debt."

## WIN SCHOLARSHIPS

Two scholarships, the gift of the Canadian Pacific Railway, have just been awarded Claude DeGue, son of the yardmaster at the Place Victoria Station, Montreal, and Maurice LaFleur, son of the company's agent at Shawinigan Falls, respectively. They will cover five years' tuition at Ecole Polytechnique of the University of Montreal and three or four years' tuition at Ecole des Hautes Etudes Commerciales.

The Ecole Polytechnique scholarship covers five years tuition in civil engineering (general engineering) and is offered, subject to competitive examination, to apprentices and other employees on the permanent staff of the company, under 21 years of age and to minor sons of employees.

The scholarship of the Ecole des Hautes Etudes Commerciales is offered to employees on the permanent staff or to permanent employees. It covers three years tuition for a student of Bachelor of Arts or its equivalent and not over the age of 23, or four years tuition for Maurice LaFleur candidate holding the degree of Bachelor of Science or Bachelor of Letters, his equivalents, and not over the age of 22 years.

## Handling Of Grain

Valuable Hand Book Dealing With This Subject Has Been Issued

A "Hand Book on the Sale and Handling of Grain Through a County Elevator," by T. J. Harrison, Assistant Grain Commissioner for Manitoba, has been issued by the Board of Grain Commissioners for Canada.

The purpose of this "little booklet" is to make available in simple language a statement of the provisions of the Canada Grain Act which is administered by the Board to "make the process in the handling of grain clear through the country elevators more clear and thus prevent misunderstanding between farmers and elevator operators."

The descriptive section is divided into six parts with appendices. Part I, dealing with the Canada Grain Act; Part II, with grain elevators; Part III, storing grain in a public elevator; Part IV, the sale of grain; Part V, cash advances on grain; and Part VI, shipping the grain. The appendices include "Grain Bonds," "Shrinkage Table," "Statutory Grades of Western Grain," and "Minimum and Maximum Carloads of Grain."

## AS SLIM AS AT 20

### Still Fit and Active at 55

"I have been taking the small dose of Knousen Salt every morning for the last three years. I wouldn't be without them in the house. I need to suffer with constipation and piles, but I am not troubled in that way now. I am 55 years old, and I feel as young as 20. I have to work very hard, and I have my family and my business to attend to, and I always say that the Knousen Salt keeps me fit."—M. S.

There's nothing like hard work and activity for keeping yourself fit and active. The trouble with most folks is finding the necessary energy. This is where Knousen comes in. After you have had your daily supply of Knousen every morning for a couple of weeks you'll get what is known the world over as "That Knousen Feeling."

The urge for activity will fill your entire being—you'll not be content to sit in the old arm chair after your day's work is done.

You'll feel the spirit of youth within you—what a joyous feeling—you'll want to take long walks, play games and your work will be a pleasure—your work will be a pleasure.

Vessels being built in Italy total 171, which is 29 more than a year ago.

Building of the University of Manitoba's science buildings will be resumed with the government in relief matters.

E. D. T. Chambers, 79, dean of Quebec, is dead.

Trail losses in Alberta during the past season totaled \$354,000 on a risk of \$1,586,000, according to a statement issued by the Provincial Insurance Board.

Unable to sell its lumber otherwise, a sawmill company in Singapore, Straits Settlements, used it to build 170 houses, which now are being offered for sale.

The first shipment over the new extension of the Temiskaming and Northern Ontario Railway from Moos Factory consisted of 8,000 pounds of fur, valued at \$160,000, by Premier George S. Henry was informed.

Mexico believes that Canada should be invited into the Pan-American Conference, Jesus Silva Herzog, chairman of the Mexican delegation to the Pan-American Commercial Conference, stated at Washington.

Germany's grand old man, President Paul Hindenburg, recently observed his 84th birthday anniversary on October 2 in physical, mental and moral vigor which he attributes to hard work and plain living.

William Bright, a member of the expeditionary force sent to the relief of General Gordon when he was besieged at Khartoum and at one time batman to Lord Kitchener, died recently at Chattanooga, Tenn.

The first automobile made and sold in the United States was a Winton. The date of the first sale was March 24, 1888. It is now among the relics at the Smithsonian Institution at Washington, D.C. The top of the car is the same as a buggy or phaeton.

Sir Robert Hamilton, member of Parliament for Orkney and Shetland, has been appointed chairman of the Colonial Advisory Council of Agriculture and Animal Health, in succession to Dr. Drummond Shiel, it was announced. Sir Robert is under-secretary for the colonies.

### Vegetables From Manitoba

Fresh vegetables from the farms of Manitoba, which are to be used in England for exhibition purposes by the Federal Department of Agriculture, were shipped by the S.S. Ascania from Montreal. The display is fully representative of the vegetables produced by Manitoba farmers and occupies some 50 cases.

### Air Space For Health

The ideal for health is at least 1,000 cubic feet of space for each individual. This means for example that a room ten feet long, ten feet wide and ten feet high provides the right amount of air for each person. Of course, there must be constant and adequate ventilation as well.

## Praises Famous Vegetable Pills For Indigestion

"Having been troubled with indigestion and Sick Headaches for several months, I was recommended to try your famous Pills. After the first dose I was made aware of their very real tonic value."—Miss M. Crofton.

Dr. Carter's Little Liver Pills are no ordinary laxative. They are all vegetable and have a very delicate, pleasant action upon the liver—exactly what you need to treat Constipation. Biliousness, Headaches, Pimples, etc. All druggists, 25c & 75c per box.

W. N. U. 1911

## Pensioners Lose Out

Drop in British Pound Sterling Works Hardship On Imperial Pensioners

The Dominion headquarters of the Canadian Legion has made a strong protest to the British Ministry of Pensions regarding the loss being sustained by imperial pensioners in Canada as a result of the drop in value of the pound sterling.

The British ministry representative at Ottawa has been instructed by the home government, the Legion, has been informed, to continue to pay pensions in sterling, which means that the pensioner has to bear the loss in exchange.

Major J. R. Bowler, Dominion general secretary of Legion, sent the following telegram to British Empire Service League, headquarters in London, England:

"Drop in exchange causing grave additional hardship to thousands of Imperial pensioners in Canada."

"Will the B.E.S.L. after conferring with other member organizations, make representations to have pension payments stabilized at the equivalent of par, \$4.86?"

A similar communication has also been sent by Major Bowler to the British ministry representative at Ottawa.

## Turner Valley Gas

Experimental Plant For Extraction Of Benzene Nearing Completion

The experimental plant for the extraction of benzene and other by-products from Turner Valley gas is nearing completion at the Institute of Technology, Dr. E. H. Boomer, associate professor of chemistry, told a meeting of the Oil and Gas Association recently. He explained that about 500 feet of gas per hour will be used at the new plant, from which half a gallon of benzene will be extracted.

By Annebelle Worthington

Canada's oldest tunnel, the Canadian Pacific Railway tunnel under the Town of Brockville, Ontario, was opened Sept. 16, 1864, 77 years ago. At that time the tunnel, built under great difficulties, was owned and operated by the Brockville and Ottawa Railway, later absorbed by the Canada Central Railway, and finally by the Canadian Pacific Railway. The tunnel is now owned by the Dominion, and trains still pass through it daily.

Two new islands have appeared in the southern Atlantic Ocean near Brazil.

The germ of cerebrospinal meningitis was discovered in 1887.

Motor Vehicles In Canada. There were 1,230,886 motor vehicles registered in Canada at the end of 1930, an increase of 44,249 over the total registration at December 31, 1929. The "automobile density" of Canada is one motor vehicle for every eight persons in the Dominion.

"Husbands," said an old Scottish woman, "are verra like teeth. They're mighty hard to get, an' ye're a deal o' trouble all the time ye have them, but they leave an awful blank when they're gone."

Employer: What we want is a smart boy, alert and intelligent. Are you quick to take notice?

Man: (applying, proudly): Yes—'ad it twice in a fortnight once!

The dress which the Professor of Mathematics gave to his wife to remind him to kiss her now and then—Shun Humor, Madrid.

## FARM MANAGER

A. J. Clark, farm manager, in Melita, Manitoba Zone.

## Farm Management Program

Colonization Finance Corporation Of Canada, Limited, Operating In Manitoba and Eastern Saskatchewan

With the appointment of A. J. Clark, to the position of farm manager in the Melita, Manitoba zone, the Colonization Finance Corporation of Canada Limited, completed its farm management programme in the province of Manitoba and eastern Saskatchewan.

Mr. Clark, who was born in Montreal, came to Manitoba as a child, with his parents. His natural aptitude for agriculture took him to the Manitoba Agriculture College from which he was graduated in 1917, with honours in animal husbandry. He shortly became attached to the livestock branch of the Saskatchewan Government, where he remained as purchasing agent until 1928, his duties taking him not only over western Canada, but through both Ontario and Quebec.

Since 1929 he has been on his own farm at Stonewall, Man., where he has specialized in pure bred shorthorn cattle and Yorkshire pigs.

With Frank W. Helmuth as chief farm manager, the following six have been stationed by the Colonization Finance Corporation, Mr. Clark taking over his new duties immediately.

Russell W. Goward, Winnipeg secretary; J. Siemens, Brandon; A. R. Judson, Dauphin; W. J. McLeod, Mossburn; A. J. Clark, Melita, and George H. Jones, Portage la Prairie.

## Bees Swarm In London

Three Swarms Invaded Busy Metropolis In One Day

Each summer a swarm of bees is sure to take possession of the busy streets of some city; but it is not often that three swarms arrive on the same day. That, however, happened to London.

One swarm chose King Street, Hamersmith, and few round buses and street cars in clouds before settling on a tree; the police were in charge of the tree—'a barricading it. The second swarm is the roof of a house in St. Paul's; and the third chose the window-sill of a flat in Baywater.

Canada's Oldest Tunnel The Canadian Pacific Railway tunnel under the Town of Brockville, Ontario, was opened Sept. 16, 1864, 77 years ago.

Two new islands have appeared in the southern Atlantic Ocean near Brazil.

## Exploring Mystery Of Easter Island Images

New Jersey Millionaire Taking Scientific To South Seas

A yacht, reputed to have cost its shining white hull into Glen Cove Harbor, New York, to be made ready for a trip to Easter Island, 20 scientists will attempt to solve the mystery of a "lost civilization." The island is in the Polynesian group in the South Pacific Ocean.

Since the discovery of the island on Easter Sunday, 1722, by the Dutch Admiral Roggeveen, there have been various indications of existence of a past culture.

The expedition of Edridge R. Johnson, of Moorestown, N.J., will try to determine, among other things, why carved and erected huge stone statues on the island; who made the wooden images, found in profusion there; and what feats of engineering were required to move the stone images, some of them weighing many tons.

Huge blocks of stone form the walls surrounding some of the cities, and the origin of the city is a mystery. Prof. MacMillan Brown, of Christ Church, N.Z., 12 years ago found carved, alphabetic characters.

Mr. Johnson has long been interested in scientific exploration, but has not yet made public the names of the scientists who will make the expedition.

## Aerial Photography

Speed and Vibration Make Fast Lens A Necessity

In the camera equipment for aerial mapping operations carried on by the Topographical Survey of the Department of the Interior through the co-operation of the Royal Canadian Air Force, a fast lens must be employed, as not only must the speed of the aeroplane be taken into account, but also any vibration that may occur to the camera which is mounted in the "plane" does not eliminate it.

As a general principle, lenses working at a maximum aperture equal to one-quarter of its focal length, are employed. Lenses of this speed and having a fairly large covering power are now obtainable.

To further speed up the action of obtaining the aerial photographic record, the emulsion with which the photographic film is coated, is especially prepared by the manufacturers so as to be super-sensitized to the image-forming rays of light.

## Trappers Go North

Belief Expressed That Coming Season Will Be Good For Beaver

Manitoba trappers are leaving for the north in large numbers to prepare for the winter season.

Many have gone up along the Bay Coast, while others will be confining their work to the inland areas. White and silver ermine, muskrat, mink, marten and beaver will, according to indications, be caught in lesser quantities.

A considerable number of trappers are setting in the James Bay coastal region in the neighborhood of Severn and York Factory.

According to indications, the men say the coming season will be good for beaver.

## To Solve World Troubles

Noted British Author Says World Should Be Devalued Bankrupt

H. G. Wells, noted British author, has formulated the following prescription for the ills of the world:

The world should be declared bankrupt and its debts written down to one central world authority.

War should be abolished and all foreign offices, diplomatic services, armaments, dockyards, war offices, navies and air-forces scrapped, disbanded and pensioned.

The earth should be ruled by a dictatorship, not of this man or that man, but of informed and educated common sense.

Motor Vehicles In Canada. There were 1,230,886 motor vehicles registered in Canada at the end of 1930, an increase of 44,249 over the total registration at December 31, 1929. The "automobile density" of Canada is one motor vehicle for every eight persons in the Dominion.

## The ADVENTURES OF CAPTAIN JIMMY and his Dog SCOTTIE

WHY? CAMP BEFORE! Late one afternoon, while on board the freight ship "The Captain," Captain Jimmy and his friends sighted a small boat with a man and a dog. They took off to the rescue in the twinkling of an eye.

As we drew nearer, through the twilight, the man and the dog were seen. The man was a big fellow, and the dog was a big fellow. They were both looking at us with great interest.

A little ship lay over with a heavy list to starboard, evidently leaning from the most likely water. A large Chinaman was here and there, looking at the number of figures bound to the rail—evidently on their way to the gallows.

We passed overhead, the pirates greeted us with a volley, but they were not in the least bit afraid of us. We could hear the sound of their muskets as they fired.

About half a mile away, I turned to look back at the ship. It was still there, still leaning over, still firing at us. It seemed as if it would never stop.

Combining the ingredients, and cook in a preserving kettle until the chutney is thick and clear. Stir frequently to prevent burning. Pour into hot, sterilized jars and seal.

GENOESSE CAKE 1½ cups sweet cake flour, sifted. 1½ teaspoons baking powder. ½ cup butter. 1 cup powdered sugar. 1 teaspoon lemon extract. 4 eggs, well beaten.

Sift flour once, measure, add baking powder, and sift together three times. Cream butter thoroughly until light and fluffy. Add flour, and add eggs, alternately with flour, a small amount at a time, beating well after each addition. Turn into greased, paper-lined 8 x 8 x 2 inches. Bake in moderate oven (350 degrees Fahrenheit) 50 minutes.

Customer:—What's this in my soup? Waiter:—Don't ask me, sir, I don't know one insect from another.

Don't Let Foods Stale Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-San Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-San in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Water:—Don't ask me, sir, I don't know one insect from another.

Holder & Stoughton, Ltd., London.

**CHAPTER III—Continued**

"I fear I seem intrusive. But I am so interested in your future, I cannot help myself. You, mademoiselle. That must be my excuse." She rose from the table, adding smilingly: "At least you will not find it dull, since Lady Anne has two sons. They will be companions for you."

Jean rose, too, and together they passed out of the salie a mangle. "And what do you propose to do with yourself today?" asked the Countess, pausing in the hall. "My husband and I are going for a sleigh drive. Would you care to come with us? We should be delighted."

She shook her head. "Very kind of you. But I should really like to try my luck on the ice. I haven't skated for some years, and as I feel a trifle shaky about beginning again, Monsieur Griolet, who directs the sports, has promised to coach me up a bit some time this morning."

"But," Madame de Varigny nodded pleasantly. "You will be well occupied while we are away. Au revoir, then, till our return. Perhaps we shall walk down to the rink later to witness your progress under Monsieur Griolet's instruction."

She smiled mischievously, the smile irradiating her face with a sudden charm. Jean felt as though, for a moment, she had glimpsed the woman the Countess might have been but for some happening in her life which had soured and embittered it, setting that strange implacability within the liquid depths of her soft, southern eyes.

She was still speculating on Madame de Varigny's curious personality as she made her way along the

beaten track that led towards the rink, and then, as a sudden turn of the way brought the sheet of ice suddenly into full view, all thoughts concerning the bunch of contending skaters that goes to make up individual character were swept out of her mind.

In the glory of the morning sunlight the stretch of frozen water gleamed like a shield of burnished silver, whilst on its further side rose great, tree-trunks, mysteriously dark and silent, climbing the steeply rising ground towards the mountains.

There were a number of people skating, and Jean discovered Monsieur Griolet in the distance, supervising the practice of a pretty American girl who was cutting figures with an ease and exquisite balance of limb body that hardly seemed to stand in need of the instructions he poured forth so volubly. Probably, Jean decided, the American had entered for some match and was being coached up to share his credit accordingly.

She stood for a little time watching with interest the varied performances of the skaters. Bands of light-hearted folk, indulging in the sport just for the sheer enjoyment of it, sped gliding by, broken snatches of their talk and laughter drifting back to her as they passed, whilst groups of more accomplished skaters performed intricate evolutions with an earnestness and intensity of purpose almost worthy of a better cause.

Jean felt a little stranded and forlorn. She would have liked someone to share her enthusiasm for the marvels achieved by the figure-skaters, and to laugh with her a little at their posturing, whilst groups of more accomplished skaters performed intricate evolutions with an earnestness and intensity of purpose almost worthy of a better cause.

She was something curiously distrustful about the man. Brief as was her vision of him, it possessed an indefinable vividness of impression that was rather startling.

He flashed by, his arms folded across his chest, moving with long rhythmic strokes which soon carried him to the further side of the rink. Jean's eyes followed him intently. He seemed an unsuspicious, unassuming, and he seemed to be as solitary as herself, but, unlike her, he appeared to have a clear, absorbed in his own thoughts which, to judge by the sun, brooding expression of his face, were not particularly pleasant ones.

He was not particularly pleasant ones. He was not particularly pleasant ones. He was not particularly pleasant ones. He was not particularly pleasant ones.

He was not particularly pleasant ones. He was not particularly pleasant ones. He was not particularly pleasant ones. He was not particularly pleasant ones.

passed her when she had been watching the skaters.

He lifted his cap, and as he stood for a moment barchesided beside her, she noticed with a curious little shock—half surprised, half appreciative—that on the left temple his dark brown hair was streaked with a single pure white lock, as though a finger had been laid upon the hair and added where it lay. It conferred a certain air of distinction—an added value of contrast—just as the sharp black shadow in a neutral-tinted picture gives sudden significance to the whole conception.

The stranger was regarding Jean with a flicker of amusement in his grey eyes.

The stranger was regarding Jean with a flicker of amusement in his grey eyes.

"That was a near thing," he observed.

Evenly he judged her to be a Frenchwoman, for he spoke in French—very fluently, but with an unmistakably English accent. Instinctively Jean, who had been so frequently called upon to converse in French as English, responded in the same language.

"You're right, I hope. Did you twist your ankle?"

"No, oh, no," she smiled up at him. "I can't have fastened my skate on properly, and when it shot off like that I'm afraid I rather lost my head. You see," she added explanatorily, "I haven't skated for some years. And I was never very proficient."

"I suppose it was. However, as you luckily happened to be there to save me from the consequences, no harm is done. Thank you so much."

There was a note of dismissal in her voice, but apparently he failed to notice it. For he held out his hands to her, saying:

"Let me help you to the bank, and then I'll retrieve your errand skate for you."

He so evidently expected her to comply with his suggestion that, almost without her own volition, she found herself moving with him towards the edge of the rink, her hands clasped in a close, steady clasp, and a moment later she was scrambling up the bank. Once more on level ground, she made a movement to withdraw her hand.

"I can manage quite well now," she said rather nervously. There was

something in that strong, firm grip of his which sent a curious tremor of consciousness through her.

(To Be Continued.)

**Bedouin Given Credit Of Inventing Alphabet**

Chicago Professor's Idea Typifies Theory of Many Scholars

Some unknown Bedouin man, working for the ancient Egyptians, about 1500 years before Christ, is credited by Prof. Martin Spingarn, of the University of Chicago, with inventing the A, B, C. The nine man, puzzled by the complex hieroglyphics of his masters, sought a shorter way to keep his records, and simplified his work by developing a rudimentary alphabet, in the opinion of Prof. Spingarn. He based his theory on his translation of the Sinal inscriptions found in 1804 by Sir Flinders Petrie. In Sinal, which lies between Egypt and the northern part of Arabia. His theory would explain the fact that many scholars have attributed the development of the alphabet to the Phoenicians.

**Must Be Good Fighters**

**French Scientist Wants To Raise Race Of Super-Cats**

The production of a race of "super-cats" capable of driving all mice and rats from any city in France was suggested by Dr. Jean Loir, distinguished scientist and nephew of the famous Pasteur.

Dr. Loir said he was developing the cat at Havre where secret tests have made devastating inroads on rodents, some as large as small dogs, along several "charvantes."

Dr. Loir is seeking cats with a highly developed sense of smell and with fighting ability. Most of the cats with which he has experimented so far have been remarkable for the length of their whiskers.

**Famous Wills Kept In Somerset House**

Can Be Inspected On Payment Of Small Fee

Storage accommodation at Somerset House, London, England, where wills, birth and marriage certificates, and divorce documents are filed, has for many years been severely taxed. The position has now been eased by the preparation of a new strong-room below the level of the Embankment, capable of holding ten million additional papers. Some of the wills date back to 1382. Among the collection are those of Shakespeare, Milton, Nelson, Wellington, Pitt, Burke, and Dr. Johnson. All these can be seen for a fee of 1s., except that of Shakespeare, for which 2s. is charged. Altogether it is estimated that Somerset House contains fifty million documents.

**Douglas' Egyptian Liniment** is a remedy for sore muscles, rheumatism, sprains, bruises, and other ailments. It is a powerful antiseptic and disinfectant. It is a powerful antiseptic and disinfectant. It is a powerful antiseptic and disinfectant.

**French Laboratory Making Experiment**

**Trying To Acidimatis Trees Which Produce Field Like Milk**

An experiment with trees that produce milk and cream is being conducted by an important French laboratory.

Several living trees of the family "Brosimum Galactodendron" were brought to France from South America, and work has been started to acclimatize them to northern European conditions. The trees, when produced, will give a milk like milk. It does not turn sour and laboratory tests show that it is richer than cow's milk in phosphates and sugar. It looks and tastes much like the real product and is produced at 65 per cent. of the cost of ordinary cream.

**Cure Curing During Fall Months**

Dr. J. A. Riddick, Dominion Dairy Commission, calls attention to the importance of maintaining adequate temperatures for the curing of cheese during the fall months, particularly October and November. The temperature of the curing rooms should never be allowed to go below 60 degrees Fahrenheit, and the cheese should be turned every day. A fire in the curing room keeps the air drier than a fire in the curing room.

The Blue Nile in Africa was so called from the dark colour of its salt-laden waters.

Millions in money can make a man miserable if he is all the treasure that he lays up.

**Serious Rectal Troubles Often Caused By Harsh Cathartics**

ENO'S is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

**ENO'S "FRUIT SALT"**

**A Cherished Record**

**Mother Keeps Baby Only Link With Dead Father**

With millions of dollars stored away in the vaults of one of Washington's largest financial institutions, Plunkett naturally surprised one to learn that a cracked photograph record, held for safe keeping there, is "the most precious thing" under lock and key. And why shouldn't it be? Listen what the head of the bank related interestingly the other day, after he looked up from his desk only to see standing before him a little old woman, dressed in black. Plunkett's round package on the desk he said she told him—"Please, I want this put away where it will be safe. It is very precious to me." Further inquiry revealed, the banker said: "It is her son, a singer in a local cabaret, marched away to war and stayed in Plunkett's safe."

He said to remember him by was a photograph record which he had made before he left. It was old and scarred now, and had a crack in it, but he sung, singing one of the numbers he had sung at the cabaret, was still recognizable. It was the record she wanted to preserve. And now, once a year, on her son's birthday, the banker said, the little old woman comes to the bank and takes home the record."

**THE RHYMING OPTIMIST**

By Aline Michaels

**BY TIME UNSTAINED**

This is the greatest love, the love that lives  
Unchanged by changing time and circumstance,  
That still a portion of its glamour gives  
To touch with peace each whine of madcap chance.

It lends a life's beginning, strange and long,  
A blessing by naught else conferred;  
It is the sweetness lingering after song,  
The hidden meaning of the spoken word.

No part in it have years, for it may be  
Unchanged by time's turning page.  
The treasure of the heart from youth to age,  
Obliterated by time's turning page.

The fair ideal, desired and unattained,  
This is the only love by time unstained.

**As a verminous effective preventative** Mother's Graves' Worms, Elixterminator, and it can be given to the most delicate child without fear of injury to the constitution.

**Hydro Development**

Total water-power installations in Canada have grown from 71,515 horse-power in 1860 to 6,125,012 horse-power in 1925. The increase is 85 per cent. of the present installation is installed for general distribution by central electric station organizations.

**Good has but one enemy, the evil, but the evil has two enemies, the good and itself.**

A man's good judgment usually shows up the day after.

The most peaceful place in which to live is within one's income.

**Moan Erratic In Its Course**

The moon is so erratic, scientists say, that its position cannot be determined as exactly as that of stars. There is, it is never known where it is in its theoretical orbit, and what is so strange, it is the only body known to disobey such laws. In an effort to solve this mystery, computers of the naval armory are making a two-year check on the occultations of stars by the moon.

**Suffered Severe, Painful Cramps In Her Stomach**

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be due to a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.B., writes:—"I have suffered greatly from severe and painful cramps in my stomach for several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Health Service

OF THE

Canadian Medical Association

Edited by

GRANT FLEMING, M.D., - ASSOCIATE SECRETARY

Does Your Child See?

When a child is blind in both eyes, the condition is of course recognized. There are many children, however, who have defective eyesight, which fact is unknown to their parents. That this is so is evidenced by the number of children entering school, who are found by school physicians to have defective eyesight.

The good work done by the school health services does not provide for the pre-school child, or for the child who attends a school where there is no school physician or nurse.

A child should be able to recognize a picture or object one-half inch square at twenty feet. Cross-eyes is tested separately, one eye being covered with a card during the test of the other. For near vision, a picture book may be used. If there is any appreciable defect in either eye, whether for near or distant vision, the family physician should be consulted.

Cross-eyes is a condition which is frequently neglected, because of the parents' ignorance to its significance. Children with this condition should be placed under medical care without delay. A cross-eyed child sees double. This causes confusion and so the mind trains itself to pay attention only to the image that comes to it through the straight eye. This results in one eye being developed through use and the other one becoming useless because it is not used.

Unless the condition is properly treated early, the child then loses the use of one eye and is actually blind in that eye. If the child is treated before two and three years of age, the most of all his vision can be saved, the longer the treatment is delayed, the more vision is lost. Cross-eyes is a condition which does not correct itself. Children do not grow out of it.

If the child is placed sitting, facing the parent, an arm's length

away, with one eye covered by the parent's hand, and is able to look at the parent's nose with the uncovered eye, the parent will find that on uncovering the other eye, it is either looking at the nose, which means that no cross-eyes is present, or that it moved in, or out, or remained crossed in, or out, which is evidence that cross-eyes is present. Your children will appreciate in later years, the care you give now to this special organ.

Sheep As A Side Line

Although there is no apparent relief in sight for the general depression in agriculture, conditions farmers are naturally looking for ways and means of improving these conditions. A few sheep as a side-line on many farms would not only bring in some casual revenue from both meat and wool, and

provide the household with delicious lamb and mutton, but in most cases would earn their board as a scavenger of weeds and rough forage crops.

The investment incident to establishing a small flock is relatively small compared with the amount and rapidity of the returns. A few good grade ewes can be obtained in the fall and bred to good advantage, preferably one of the Down breeds that combine early maturity and deep fleshing to a high degree. At the Windermere Experimental Station the Hampshire breed has given excellent results either as a pure breed or when crossed with grade ewes. The Hampshire, as a breed, is gaining rapidly in favor. The ewes should be bred from October to December, depending upon when the farm could best handle the young. The gestation period is approximately five months, and from data gathered at the Station, the average increase has been from 170 to 175 per cent, and around 150 per cent increase has been raised.

As previously intimated, sheep are unsurpassed as scavengers of weed. There are a few varieties they will not consume, while some of the worst weed pests, such as sow thistle, are eaten with relish. They

will pick up a living around summer, fallow and stubble, and will make economical returns from otherwise often waste products. They will help

to diversify the products of the farm utilize rough forage, reduce the weed menace and enrich the land. Experimental Farms Note
